Conservative estimate for a house that used 14,000 watt hrs a day would need 26.48 square meters of solar cell

Two small (1.5-3.5m wingspan) windmills taller than anything in 150 m away

Vestas V164 Offshore windmill with a wingspan of 164m.
8-9.5 MegaWatt/Hour

About 236 square m of solar farm for 9 MegaWatt/Hour
